NIRO POWDER TECHNOLOGY

Your Partner for Original Niro Parts and Services

Reliable Quality – Proven Know-How

For a production facility to be truly successful, it must be truly reliable. The After Sales Division of Niro provides all the spare parts and expert services you need

A World of Service

The After Sales Division gives you a world of service. Our spare parts centres are strategically placed to ensure fast delivery of parts and components for your Niro plant. Service is only a phone call away.

Reliability

But service is more than just supplying spare parts. The role of the After Sales Division is to assist you to reduce downtime, improve efficiency, enhance performance and increase the lifetime of your plant. Our service agreements for key components or entire plants and our engineering know-how will keep you running – day in, day out.

More than Just Spare Parts

With more than 9000 Niro plants installed all over the world, we pride ourselves on knowing just about all there is to know about drying technology. It is a resource you can depend on to optimise and maintain individual components and complete process plants.

Spare Parts Services

An Original Niro Spare Part is more than just another replacement. It is your guarantee for perfect compatibility, reliability, optimal operation, and maximum plant longevity. Furthermore, any trouble-shooting in your plant's lifetime will be easy due to Niro's extensive documentation.

Plant Services

Niro plant maintenance service programmes demonstrate our commitment to you as a customer. By planning maintenance well in advance it is possible to ensure high availability and reduce unscheduled plant downtime. Niro agreements include:

- Rotary Atomizer and Atomizer Wheel Maintenance – ensuring operational safety with maintenance and repair work carried out on-site or in a Niro workshop.
- Preventive maintenance – Niro service agreements cover a complete mechanical audit and maintenance of your Niro plant.

Process Services

As a world leader in drying technology, Niro has the proven ability to optimise single process steps as well as entire plants. Niro can therefore assist you in gaining important benefits in:

- Process optimisation
- Plant capacity increase
- Plant retrofitting and upgrading
- Plant safety evaluation

Training is the Key

Our training programme ensures highly skilled engineering technicians to serve you. Training programmes are also available to you as a Niro customer.

Your Partner

No matter what the market demands, Niro offers the process engineering technology to match. Niro is a one-stop supplier of the most advanced drying technology available. Your partnership with the After Sales Division is of great importance to your company's overall performance and ensures that, once you have built the ideal plant to meet your requirements, it will remain a profitable investment for years to come.

A Global Partner
with a Local Presence

For every industry, in any
culture, all over the World,
Niro makes a difference with
innovative and reliable
solutions. Our network of
subsidiary companies, offices,
